PROFESSIONAL SUMMARY

Product designer for AI-native and complex B2B products, with 6+ years in design: 3.6 years as a designer and design lead across brand, content and motion, and 2.6 years as a product designer, UI/UX designer and researcher. Most recently Product Designer at Anarix.ai, an AI-native B2B SaaS company for marketplace sellers, working from problem framing to developer handoff and building the Figma design system. Experienced in human review flows, failure states, data-heavy interfaces, field research and working prototypes built in code with AI tools. Currently co-founding the Asian Craft and Research Council. M.Des in Experience Design (UI/UX), NIFT Bengaluru; BFA in Visual Communication, College of Art, Delhi.

WORK EXPERIENCE

Co-founder, Researcher, Director & Cinematographer **Aug 2026 – Present**
Asian Craft and Research Council (ACRC) — not-for-profit in formation, documenting handmade crafts across Asia

- Helping build a not-for-profit covering clothing, sculpture, painting and furniture, and guiding the design and content of its website.
- Designed and ran primary household fieldwork with silk and cotton handloom weavers in Kanchipuram: recruiting participants, conducting interviews through interpreters, and collecting structured household and income data across cooperatives, aggregators and independent weavers.
- Built trilingual consent and data-collection instruments (English, Tamil, Hindi) for participants with limited literacy, obtaining signed informed consent from every participating household.
- Authoring INDIEFOLKS Research Paper No. 001 on succession and status in Kanchipuram silk weaving (Version 0.2, under academic review), with documented methodology, positionality disclosures and openly stated limitations.
- Restructured the study's central thesis after pilot fieldwork contradicted the original hypothesis, treating an absence in the data as the main finding.
- Scripting, directing and shooting documentaries, including *The Last Generation*, built on the same fieldwork.

Product Designer **Aug 2024 – Aug 2026**
Anarix.ai — AI-native B2B SaaS for marketplace sellers • Bengaluru, India

- Designed end to end as the product moved from a dashboard with AI features to a product that AI operates, from problem framing with product and engineering to high-fidelity prototypes and developer handoff.
- Turned AI output into reviewable actions that people could check, adjust and approve before anything changed live, with the reason shown beside each recommendation.
- Designed low-confidence, missing-data, slow-response and wrong-answer states as carefully as the main flow, so people could recover without starting again.
- Simplified data-heavy enterprise analytics through information architecture and interaction design, leading with the decision a manager needs to make.
- Built and maintained a scalable Figma design system (component libraries, variables, motion tokens and documentation), giving every AI surface one shared language.
- Ran moderated usability testing on AI-driven flows before release and turned the findings into design changes.
- Worked with PMs and engineers in Agile, using AI tools (Lovable, Emergent, Grok, Claude) to shorten the path from idea to prototype.

UX / Product Design Intern **Jul 2024 – Aug 2024**
Pepper Square • Bengaluru, India

- Contributed to product design and UX optimisation work, delivering design artefacts alongside design and product teams.

UX Designer & Researcher — Graduation Project **Jan 2024 – Jun 2024**
ideaForge Technologies Ltd. • Bengaluru, India

- Designed end-to-end user workflows for drone mission-control mobile interfaces used in surveillance, logistics and delivery operations.
- Conducted field research, contextual inquiry and usability testing with operators in live outdoor conditions, turning findings into design improvements.
- Applied heuristic evaluation and affinity mapping to synthesise research into insight reports that informed the product roadmap.
- Crafted mobile-first interaction patterns and micro-animations for real-time map controls, status alerts and gesture-based navigation.

UX Research Intern **Apr 2023 – Jun 2023**

Bosch Global Software Technologies • Bengaluru, India

- Conducted competitive analysis and qualitative user research to find friction points in B2B lead-acquisition journeys, and presented recommendations to stakeholders.
- Developed landing-page UX improvements contributing to measurable gains in lead conversion for key B2B products.

Content & Design Lead **2021 – 2022**

Energy Efficiency Services Limited (EESL) • Delhi, India

- Led design and content strategy for brand communication assets, presentations and marketing collateral across a public-sector energy programme.
- Introduced structured design workflows and asset-management processes that improved team delivery timelines by 30%.

Graphic & UI Designer (Freelance) **2020 – 2021**

Unacademy, Marcoms Avenue • Remote

- Created branded digital content, micro-animations and interactive UI concepts for education and marketing clients.
- Executed a contract-to-hire project for Unacademy on collateral design and brand strategy.

Visual Designer — Motion & UI **Jul 2018 – Sep 2020**

Dastan Productions • Delhi, India

- Designed brand identities, social-media content and explainer-video graphics for independent films and OTT projects.
- Delivered UI mockups, motion graphics and animated sequences in After Effects and Illustrator, the foundation for my UI micro-interactions today.

SELECTED CASE STUDIES

- **Designing a product that AI runs** — NDA-safe process case study of my Anarix.ai work: raja12manna-crypto.github.io/anubhav-portfolio/work/anarix.html
- **Oliv Coach** — AI rubric builder take-home; coded prototype with 15 designed states: raja12manna-crypto.github.io/anubhav-portfolio/work/oliv.html
- **Mission Assurance** — independent AI copilot concept for drone mapping crews: raja12manna-crypto.github.io/missionassurance/case-study.html
- **Canara ai1** — research-led banking super app redesign: raja12manna-crypto.github.io/canarabank/case-study.html

RESEARCH & PUBLICATION

- **INDIEFOLKS Research Paper No. 001** — Succession and Status in Kanchipuram Silk Weaving. Version 0.2, under academic review. Primary ethnographic study of handloom weaving households.
- **The Last Generation** — documentary film in production, built on the Kanchipuram fieldwork.

EDUCATION

M.Des, Experience Design (UI/UX) — National Institute of Fashion Technology (NIFT), Bengaluru 2022 – 2024

BFA, Visual Communication — College of Art, New Delhi 2014 – 2018

SKILLS

AI Product Design: human review and approval flows, confidence and failure states, AI agent UX, AI workflows, prompt engineering

Product & UX: end-to-end product design, UX research, interaction design, usability testing, design systems, information architecture, wireframing, prototyping, user interviews, A/B testing, heuristic evaluation, affinity mapping, accessibility (WCAG 2.1), design sprints

Research & Field Methods: ethnographic fieldwork, contextual inquiry, participant recruitment, informed-consent design, multilingual research instruments, qualitative synthesis, academic writing

Motion & Visual: UI design, visual design, brand identity, motion graphics, micro-interactions, illustration, video editing, animation

Tools: Figma and FigJam (expert), Adobe XD, Illustrator, Photoshop, After Effects, Premiere, Miro, Maze, Notion, Lovable, Emergent, Grok, Claude, ChatGPT

Ways of working: cross-functional collaboration, Agile / Scrum, design critiques, stakeholder management, design handoff, OKRs

Languages: English, Hindi

AWARD & INTERESTS

Winner, IFP Poster Design Crossover Competition, 2021. Interests: guitar and vocals, swimming, travel, sketching.
